CLEANING INSTRUCTIONS

It is vital to the condition of your fixtures to use ONLY non-abrasive liquid cleaners to clean any reglazed or refinished surface. Chlorine and bleach are NOT safe to use and may result in damage to the surface. ALL cleaning agents must specifically state they are safe to be used on acrylic, reglazed, and refinished surfaces.

We recommend the following products:

- Mr. Clean Multi-Surface
- Simple Green
- Tub & Tile Cleaner
- Zep Shower

Cleaning utensils such as sponges, etc. should be approved to be used on Teflon. If they are, they can be used on your newly refinished or reglazed surface.

Our standard color is Kohler white. If customer would like a dyed or tinted color, arrangements to have a custom color will need to be made and accepted ONE WEEK BEFORE your appointment. Extra charges may apply for this service.

PLUMBING

Our team is not trained, licensed, or authorized to provide plumbing advice or plumbing services. However, in some cases, it may be required that our team take away any loose handles, spouts, drain pieces, or overflow covers. If this is a necessity or occurs, our company IS accountable for those items unless the items suffer from old age, decay, or are unmanageable. If you have problematic or old plumbing, please make our team aware of this PRIOR to your appointment so precautions are taken.
